Water Treatment

High Flow Three Piece Plastic Filter Housings

AWP32B-VKP, AWP40B-V, AWP50B-V,
AWP42B-V, AWP52B-V

The Advanced Water Products line of high flow, three-piece design plastic filter housings are ideal for whole home applications.

All models are manufactured with the highest-quality FDA and NSF-listed polypropylene and come standard with ring-nut closure design which allows for easier disassembly versus common two-piece designs.

Pressure release button allows for pressure relief and air bleeding. Housings have an operating temperature range of 4-38°C (40-100°F) and a maximum operating pressure of 6.9 bar (100 psi).

**Water treatment solutions
engineered for your unique
water needs.**
